

VERITAS FORENSIC DOSSIER

Multimodal Synthetic Media & Deepfake Verification Report

OVERALL VERDICT:	AUTHENTIC / REAL (76.9%)
Analysis ID:	3fc6b6c3-03b8-403d-be4c-3fe3b5a2da54
Target File:	direct_text_input.txt
Media Modality:	TEXT
Date of Evaluation:	2026-09-12 04:22:43 UTC

1. Modality Confidence Metrics

Modality	Assessed Score (0.0 - 1.0)	Risk Classification	Model Version
Visual (Video/Face)	N/A	Low Risk / Natural	ResNet-GradCAM-v2.1
Audio (Voice/Spectrogram)	N/A	Low Risk / Natural	SpectralFlux-VocoderNet-v1.4
Text (NLP/Perplexity)	0.200	Low Risk / Natural	Perplexity-Burstiness-v1.8

2. Forensic Rationale & Key Evidence

FORENSIC ASSESSMENT: AUTHENTIC / REAL (Authenticity Confidence: 76.9%).

No definitive signatures of generative neural models, face replacement, or voice cloning were detected.

Key Evidentiary Findings:

- Text demonstrates organic lexical diversity, human burstiness, and natural cadence

Disclaimer: VERITAS AI generates probabilistic forensic assessments using spatial, acoustic, and statistical heuristics. Results should be corroborated with chain-of-custody metadata in formal legal proceedings.
